

Air Conditioning

Croon Caribe is a technical contractor that is active in Industrial, Commercial and Residential projects as well as Service and Maintenance.

We provide Electrical and Air Conditioning services to a wide range of clients on the islands of the Dutch Caribbean.

Croon Caribe is LG's service provider on the island and supplies and maintains a wide range of LG air conditioning products.

Croon Caribe specializes in **energy efficient** solutions. With LG split inverter systems and LG VRF systems, Croon Caribe can achieve energy efficient solutions with high quality equipment.

Inverter type split units are available from stock and can be installed in record time.

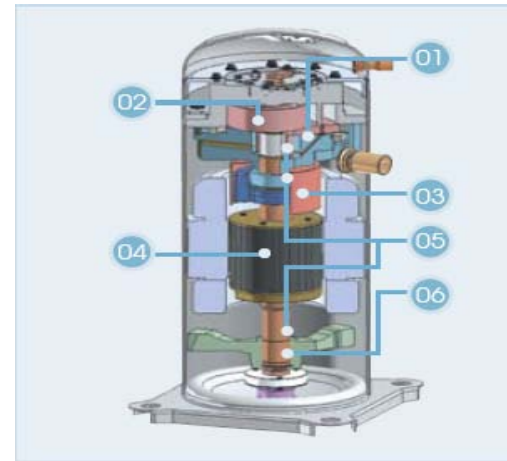

Technicians of Croon Caribe are factory trained for the engineering of LG VRF systems and can calculate the suitable system for your needs.

Croon Caribe has trained service technicians for maintenance, repairs and trouble shooting. In combination with a 24/7 service department and locally available parts, quality service is guaranteed.

For more information about these and other types of air conditioning system (or any other technical service) please contact us at:
